REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses an impedance matching circuit and method for XDSL communication. A search of prior art records has failed to teach or suggest alone or in combination an XDSL system comprising:

“an impedance matching circuit in operative communication with a transmission line and an XDSL modem associated with a subscriber premises, the impedance matching circuit including a fixed impedance having a compromise impedance providing a substantial impedance match to a plurality of common impedance characteristics of copper transmission lines wherein the impedance matching circuit provides the substantial impedance match without testing different impedances” as disclosed in claim 1.

Nor does the prior art teach or suggest, alone or in combination an impedance matching circuit responsive to a transmission line and to a modem to provide an approximate impedance match to an impedance of the transmission line, the impedance matching circuit comprising:

“a first fixed impedance including a first compromise value; and a second fixed impedance including a second compromise value; wherein at least one of the first compromise value and the second compromise value comprises an impedance value that relates to a combination of characteristics of transmission lines with and without bridge taps” as disclosed in claim 5.

The prior art also fails to teach a method comprising:

“applying an impedance matching circuit to a transmission line, the impedance matching

circuit responsive to the transmission line and to a modem that is associated with a subscriber premises, the impedance matching circuit including a first fixed impedance having a first compromise impedance and a second fixed impedance having a second compromise impedance; approximating a line impedance of the transmission line using the first fixed impedance and the second fixed impedance to provide a compromise impedance match to the line impedance; and wherein the impedance matching circuit provides the compromise impedance match without testing different impedances” as disclosed in claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
